## Photography/Digital Imaging Arts & Communications Pathway

This course provides students with entry-level skills in basic black and white 35mm photography and digital imaging. This course also covers traditional darkroom techniques along with introductory professional training in computer imaging. Adobe Photoshop and other appropriate applications are an integral part of the digital imaging sections of the curriculum.

Students also learn alternative process techniques, photojournalism, studio photography, photographing people and landscapes and night photography. Other course topics include photo restoration, the photograph as art and photographs in advertising.

In addition, students will learn how to mount, mat and display their various photographic assignments.

Students may take this course for two years.

*“I enrolled in EFE’s Photography/Digital Imaging class because I loved taking pictures as a hobby. Now years later, I couldn’t be more grateful that I turned that hobby into my career.”*

- Lesley Smith, Exelon Corporation, Chicago, IL,  
Graphic Designer, Alumna
