Transition Checklist

Transition means helping students with disabilities think about their life after school. The team must identify long-range goals and work together to ensure that the young adult gains the skills and connections they need to achieve these goals. Planning for the future is an investment in a student's well-being. Every member on the team plays an important role. Below you will find some important factors to consider during the transition process.

| Families & School Staff Should Work Together with the Student on The Following: | |
|--|---|
| | Support the introduction of in-class jobs at school. |
| | Discuss activities around career awareness, exploration, and preparation. |
| | Discuss the differences between a Michigan Merit Curriculum Diploma and a Certificate of Completion. |
| | Have the student discuss what he or she might like to do as an adult. Introduce student to people who do various types of work. Discuss what the workers do and encourage student to talk about likes and dislikes. |
| | Encourage student to strive for early independence and socialization. Involve the student in social activities that foster self-respect, self-esteem, and self-determination. |

Families Should Work with the Student on the Following:

| | |
|--|---|
| | Develop or update a Transition Planning file. Things to include may be: birth certificate, state ID, social security card, IEPs, evaluations, and other related documents. |
| | Attend and participate in the IEP meeting. Attend informational meetings regarding services available to your child. |
| | Explain the IEP process to your student and encourage student to attend the IEP meeting, or at least part of it. |
| | Encourage your child to dress and groom appropriately, and to take care of his or her own self-care needs. Use routines at home for self-care and daily living skills. Increase expectations for your child as he or she gets older. |
| | Introduce the concept of work and responsibility into everyday activities at home. Make your child a productive part of the household by introducing chores. Assign your child specific duties around the house. |
| | Get your child involved in after-school leisure and recreational activities within the community (such as scouts, sports, music, etc.). Help your child develop age-appropriate friendships and social skills at home and in the community. |
| | Consider having some initial conversations with your child about their disability. Continue the conversation with them about what strengths they have and what challenges they may face. |
| | Teach cyber safety for using the internet, phones and social media appropriately. |
| | Prior to starting middle school, visit the middle school and meet the teachers for a smooth transition. |
| | Seek opportunities for your child to engage in typical peer-related organizations (scouts, band, youth groups, libraries, museums, etc.). |
| | Inquire about peer mentors for school classes and activities. |
| | Have conversations with your child about stranger danger and other safety/vulnerability issues. |

Helpful Transition Resources

Each local school district, as well as county-wide Kalamazoo RESA, has a Transition Coordinator on staff. It is the role of the transition coordinator to work with the schools, students, and families to make connections with transition programs, provide information about available community resources, and help students to successfully transition from school life to post-school life.
